

AN INTELLIGENT INVENTORY AND SALES MANAGEMENT

SOLUTION

INTRODUCTION TO ANTFLOW?

A comprehensive, scalable, and efficient inventory and sales management solution built for warehouses, wholesale, retail, and service-based businesses.

Designed to adapt to your growth, streamline operations, and integrate seamlessly with your existing workflows.

KEY FEATURE HIGHLIGHTS

- ✓ Multi-Location Support
- ✓ Seamless Third-Party Integration
- ✓ Customizable & Scalable
- ✓ User-Friendly Interface
- ✓ 24/7 Support

KEY FEATURES

- **Inventory & Stock Management**

Track stock using Barcodes/RFID, manage multi-location transfers, and get automated low-stock alerts.

- **Production & Demand Orders**

Maintain supplier profiles, track credit limits, and manage demand orders with ease.

- **Sales Module (Bulk & POS)**

Enable fast billing, handle taxes & discounts, and manage customer returns with role-based access.

- **Reporting & Insights**

Generate exportable reports, monitor KPIs, and access real-time data dashboards.

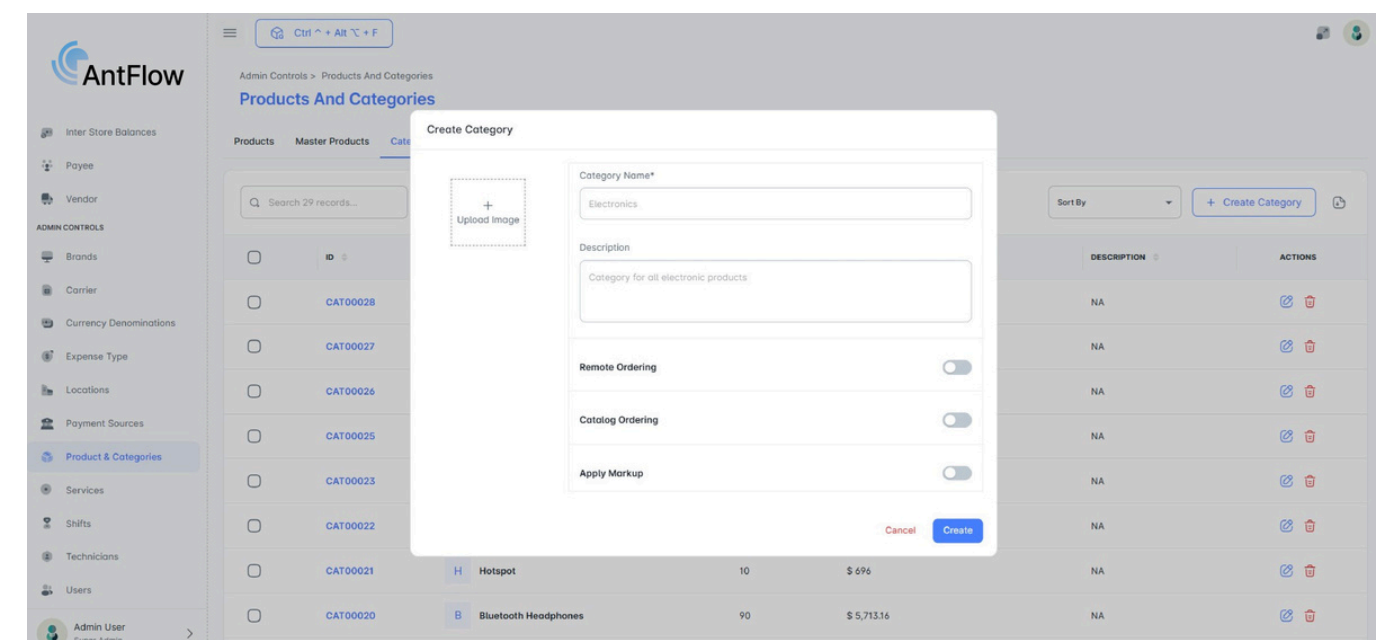

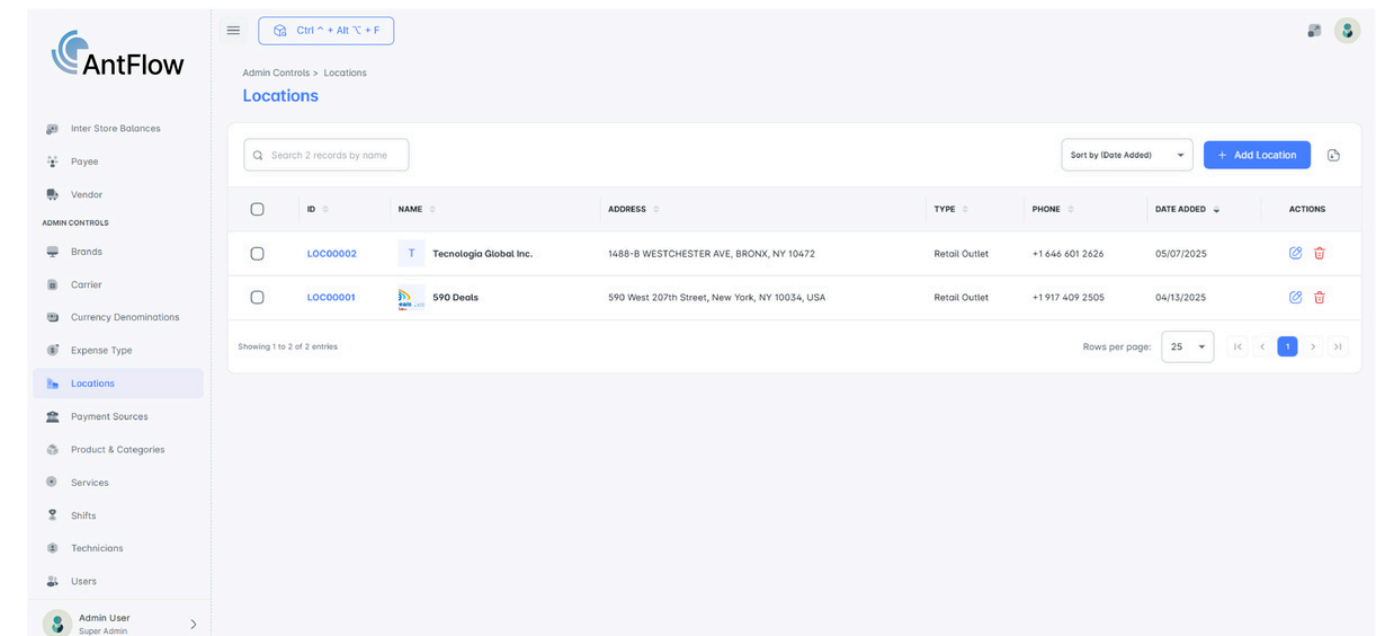

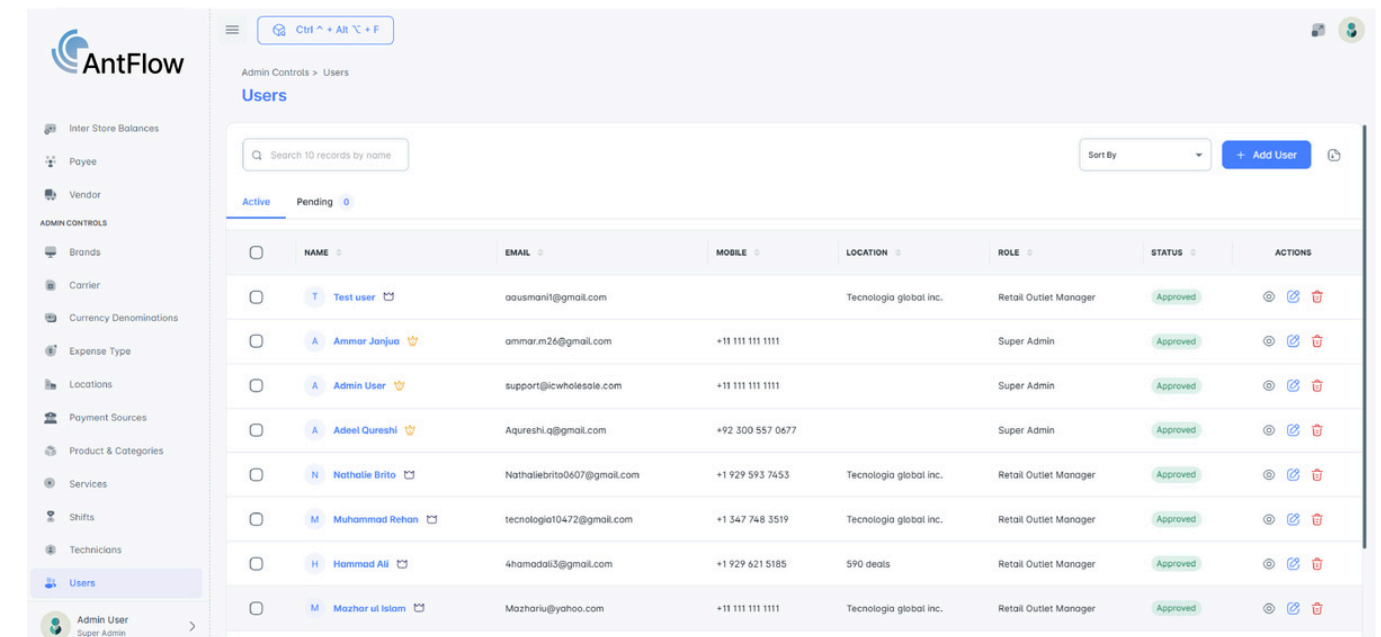

USER FRIENDLY INTERFACE

Intuitive interface designed for fast learning and seamless navigation across modules.

- User-friendly interface designed for intuitive navigation.
- Quick learning curve with minimal training required.
- Seamless workflow integration across different modules

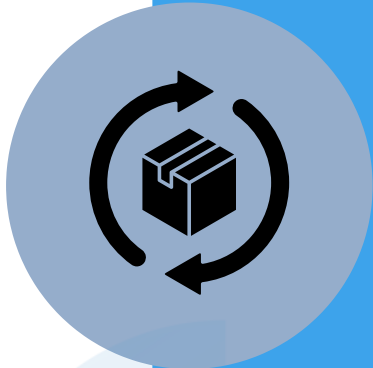

INVENTORY & STOCK MANAGEMENT

Efficiently track products, manage stock levels, and categorize inventory in real-time.

- Track and manage stock levels in real-time with automated updates.
- Categorize inventory efficiently for better organization and retrieval.
- Monitor product movement across multiple locations seamlessly.

STOCK TRANSFER

Easily transfer stock between locations with real-time data update and approval workflows.

- Easily transfer stock between locations with approval workflows.
- Track inventory movement in real time to prevent stock discrepancies.
- Optimize stock allocation based on demand and availability.

REPAIR MANAGEMENT

Manage repair requests efficiently with status tracking and automated updates.

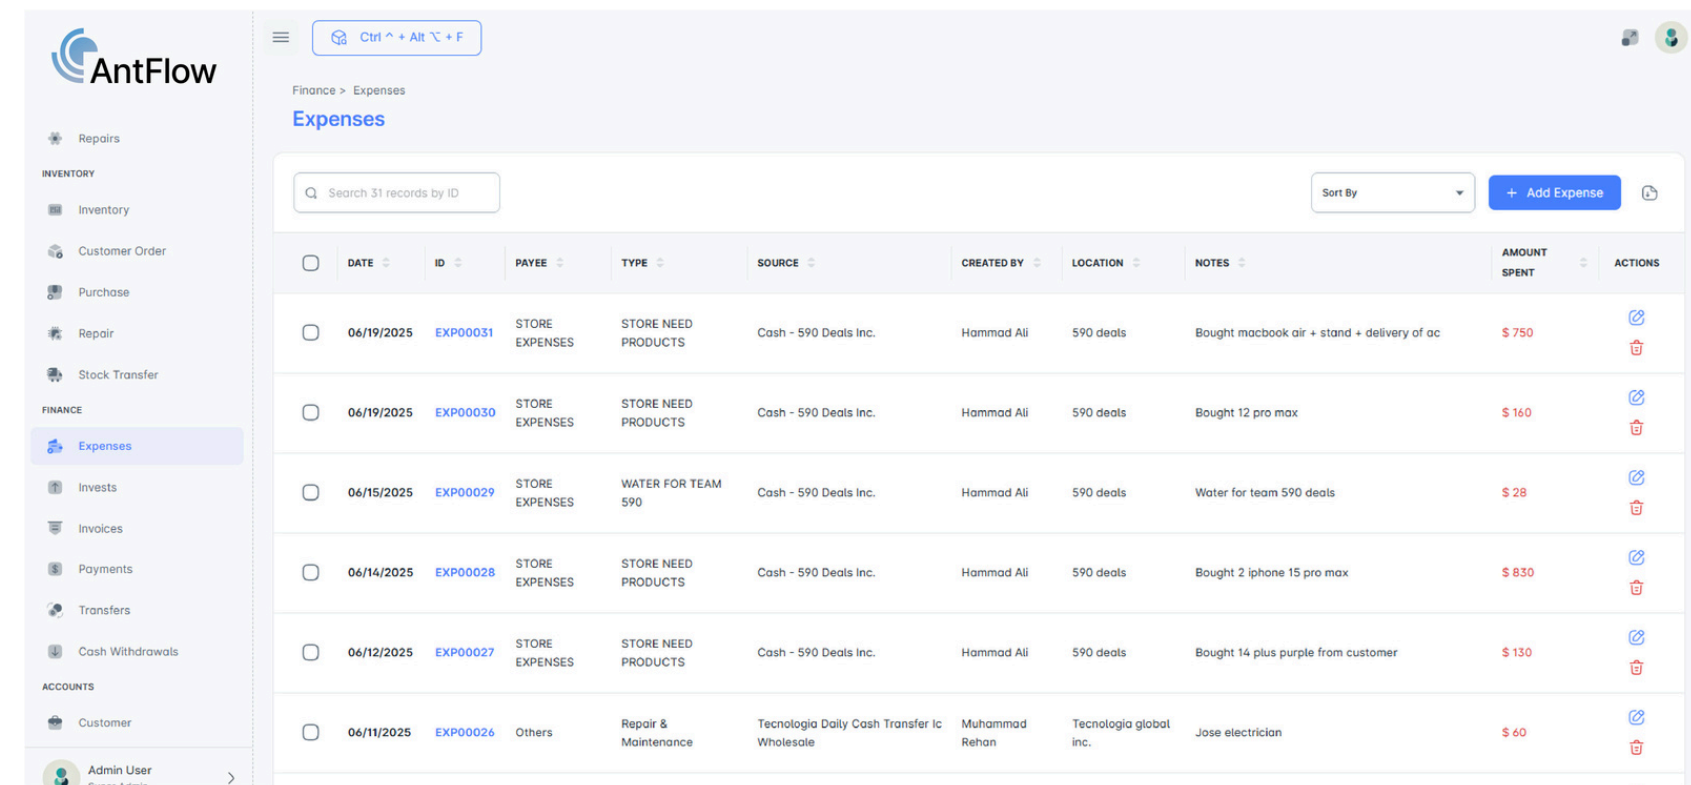

- Manage repair requests efficiently with status tracking.
- Automate updates to notify customers and internal teams.
- Maintain a digital record of repair histories for future reference.

EXPENSE MANAGEMENT

Categorize, monitor, and control expenses with detailed reporting and approval processes.

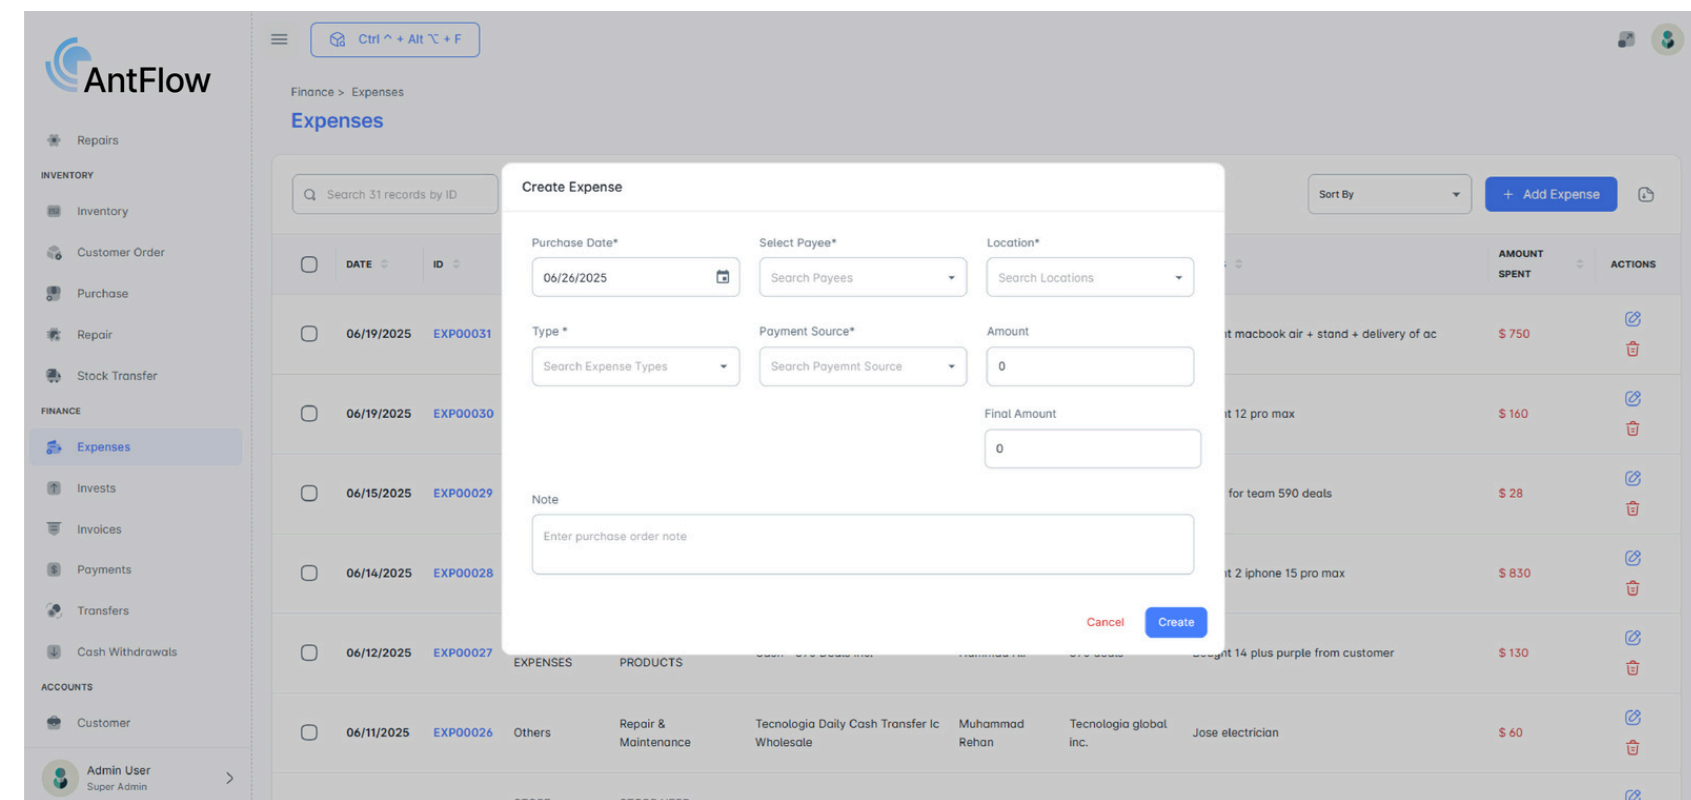

- Categorize and monitor expenses with automated tracking.
- Generate reports to analyze spending patterns and optimize costs.
- Implement approval workflows for better financial control.

The screenshot shows the 'Expenses' management interface in AntFlow. It features a sidebar with navigation options like Repairs, Inventory, Customer Order, Purchase, Repair, Stock Transfer, Finance (selected), Invests, Invoices, Payments, Transfers, Cash Withdrawals, and Accounts. The main area displays a table of expenses with columns for DATE, ID, PAYEE, TYPE, SOURCE, CREATED BY, LOCATION, NOTES, AMOUNT SPENT, and ACTIONS. The table lists several expense records, including purchases of macbooks, iPhones, and team water.

DATE	ID	PAYEE	TYPE	SOURCE	CREATED BY	LOCATION	NOTES	AMOUNT SPENT	ACTIONS
06/19/2025	EXP00031	STORE EXPENSES	STORE NEED PRODUCTS	Cash - 590 Deals Inc.	Hammad Ali	590 deals	Bought macbook air + stand + delivery of ac	\$ 750	[Edit] [Delete]

FUTURE ROADMAP

Core Feature Expansion

Auto-Stock Replenishment
Based on sales trends and reorder levels.

Supplier Rating System
Evaluate vendors based on delivery, quality, and price.

Multi-Currency Support
For global procurement and sales operations.

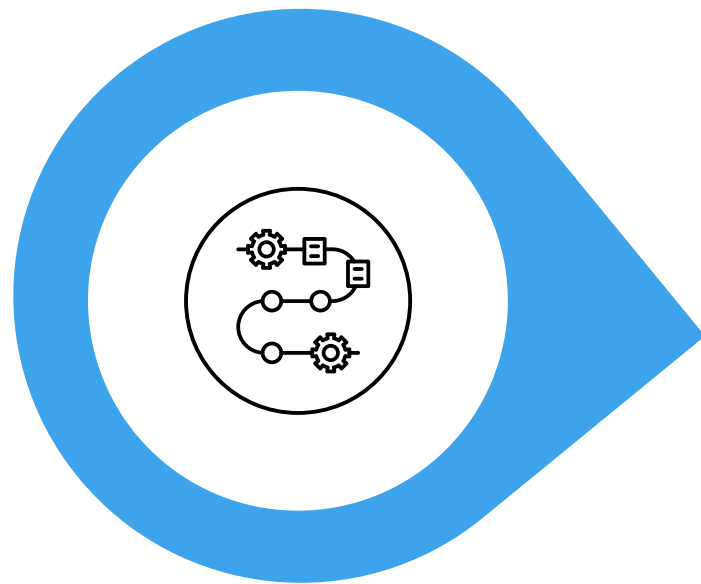

Mobile App for Sales & Inventory
Lightweight, real-time sync for on-the-go access.

Offline Mode for POS
Ensure business continuity in low-connectivity zones.

Shelf Stocking
Mechanism to allocate shelf space for new inventory and provide smart notifications to stakeholders for low-stock items.

FUTURE ROADMAP

Ai and Automation Features

AI-Based Demand Forecasting

Predict sales trends based on historical data and seasonality.

Smart Purchase Suggestions

AI-driven recommendations for reordering based on performance.

Chatbot Support System

24/7 virtual assistant for customer queries and internal operations.

Visual Defect Detection

AI-assisted image analysis for returned or repaired products.

Dynamic Pricing Engine

AI adjusts pricing based on inventory levels and market trends.

WHY CHOOSE US?

We empower your business through:

EXPERT ASSISTANCE ANYTIME

Get real-time technical support and guidance 24/7 to keep your operations running smoothly.

UNIFIED PLATFORM FOR ALL BRANCHES

Streamline workflows by managing all outlets, warehouses, and teams through one centralized system.

FLEXIBLE HOSTING OPTIONS

Choose what fits best—deploy on secure cloud servers or keep things on-premise, all with full control.
